MAX MEDIA DIGITAL

PRODUCT 101

Website **Development**

Your website should work as hard as your advertising.

maxmediadigitalllc.com

Why Website Development Matters

Every business needs an **effective** website.

Advertising can't reach its full potential without a good website.

Customizable projects for businesses of every size.

Your Most Valuable Online Asset

Your website is how most people find your business and decide whether to contact you, buy from you, or choose a competitor.

Don’t miss the chance to:

- **Be discovered** by new customers searching online
- **Capture leads** by making it easy to reach you
- **Build credibility** with current, accurate information
- **Secure sales** online with e-commerce

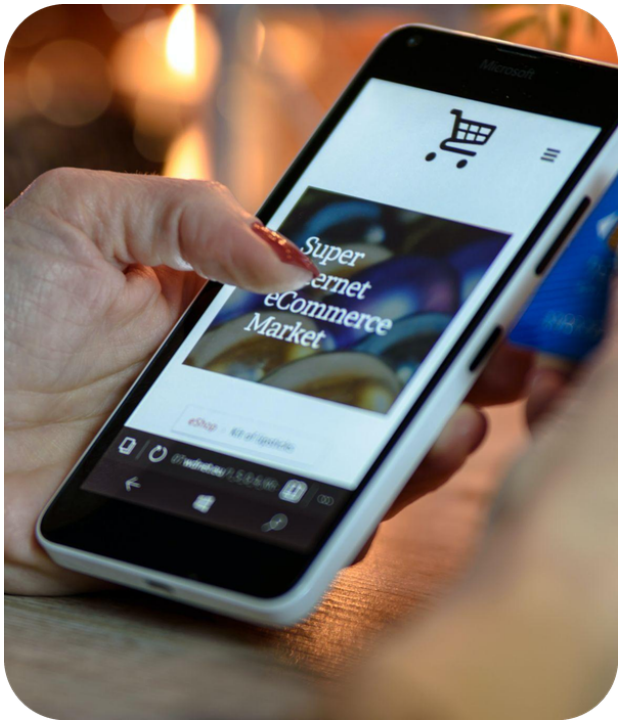

Every website service we offer supports one of these goals.

Your Digital Storefront, Open 24/7

Your website promotes your business around the clock. But even the most creative, strategic advertising campaign falls short if your site isn't built to be **discovered, inform visitors, and convert them**.

> Think of a store where the staff can't answer questions and the shelves are a mess. You wouldn't go back.
> **A disorganized website works the same way.**

Is Your Website Doing Its Job?

Every website has a job. An effective website does that job so well that it helps the business reach its bigger goals.

Visitors come with a job of their own: learning about a topic, reaching an expert quickly, or solving a problem by buying a product or service.

Does your website do its job well?

15 sec

If visitors can't tell within 15 seconds that your site can help them, they'll go to a competitor.

We fix that.

What Our Website Team Can Do

We improve existing websites or build brand-new ones, including:

- Making your site easier to find on Google
- Adding an AI-powered support chat
- Improving the mobile experience
- Increasing page-load speed
- Business email hosting
- Making your site editable without code
- Designing and building a brand-new website
- Logo design, and more

Let’s build a website that works for you.
